Every third Friday of March, June, September, and December

Index Rules

Available at alerian.com

The Alerian US Midstream Energy Index is a broad-based composite of US energy infrastructure companies. The capped, float-adjusted, capitalization-weighted index, whose constituents earn the majority of their cash flow from midstream activities involving energy commodities, is disseminated real-time on a price-return basis (AMUS) and on a total-return basis (AMUSX).

About Alerian

Alerian equips investors to make informed decisions about energy infrastructure and Master Limited Partnerships (MLPs). Its benchmarks, including the flagship Alerian MLP Index (AMZ), are widely used by industry executives, investment professionals, research analysts, and national media to analyze relative performance.

Over \$15 billion is directly tied to the Alerian Index Series through exchange-traded funds and notes, separately managed accounts, and structured products. For more information, including index values and constituents, research content, and announcements regarding rebalancings, please visit alerman.com.

It is not possible to invest directly in an index. Index performance does not reflect the deduction of any fees or expenses. Alerian does not sponsor, endorse, sell, or promote any investment product linked to or based on the Alerian Index Series. Utilities are represented by the S&P 500 Utilities Index, a composite of utility stocks in the S&P 500. Real Estate Investment Trusts (REITs) are represented by the Real Estate 50 Index, a supplemental benchmark to the FTSE NAREIT US Real Estate Index Series to measure the performance of larger and more frequently traded equity REITs. The S&P 500 is a capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy. Bonds are represented by the Barclays US Aggregate Total Return Bond Index. Performance is provided on a total return basis. Correlation to the S&P 500 is based on monthly data over the trailing 3-year period. Percentage of positive months, standard deviation, value of \$1,000, and Sharpe ratio comparisons are based on monthly data over the trailing 3-year period. For sector weighting purposes, constituents are classified according to the business in which they generate the most distributable cash flow.
