

## Pipeline Transportation

*Petroleum, Natural Gas*

Transportation via large-diameter pipeline of crude oil, refined petroleum products, natural gas, and natural gas liquids.

## Gathering & Processing

*Petroleum, Natural Gas*

Transportation from the wellhead to processing plants, which separate methane from NGLs, which are themselves separated at fractionation plants.

## Storage

*Liquids, Gas*

Storage of crude oil, refined petroleum products, natural gas, and natural gas liquids in aboveground tanks, depleted gas reservoirs, aquifers, and salt caverns.

## Production & Mining

*Hydrocarbons, Coal, Frac Sand*

Production of crude oil, natural gas, and natural gas liquids from wells; and the extraction of coal and frac sand from mines.

## Marketing

*Retail, Wholesale*

Retail distribution of heating fuels (propane and heating oil) and wholesale distribution of motor fuels (gasoline and diesel).

## Marine Transportation

*Petroleum, LNG*

Transportation via tankers and carriers of crude oil, refined petroleum products, and liquefied natural gas over bodies of water.

## Services

*Midstream, Upstream*

Provision of field services to the midstream and upstream sectors, including compression, offshore drilling, and saltwater disposal.

## Catalytic Conversion

Conversion of a feedstock over a catalyst to produce nitrogen fertilizers (UAN and ammonia), petrochemical feedstocks (ethylene and methanol), and coke.

## Mineral Interest

Ownership of mineral and royalty interests leased to third parties that develop, mine, and sell the reserves in exchange for payments.

## Refining

Processing of crude oil into refined petroleum products, including gasoline, diesel, jet fuel, petrochemicals, and liquefied petroleum gases.

## Regasification

Conversion of natural gas from a liquefied state to a gaseous state via floating storage and regasification units acting as import terminals.

## Other

*Liquefaction, Rail Terminating*

Other activities in which only one partnership is primarily engaged, including the liquefaction of natural gas and rail terminating.
