

Metaverse currently has the most overlap with Streaming & Gaming sector...

Source: VettaFi, data YTD through July 22, 2022

...with more weight in information technology

Source: VettaFi, index weights as of July 22, 2022

What index-linked ETFs currently exist?

While DWRLD is currently linked to a Canadian-listed ETF—the CI Galaxy Metaverse ETF (CMVX CN)—there are only a few passive U.S. listed metaverse-themed ETFs. Most of these have a small amount of total assets and are all recent launches, with the oldest ETF launching just over a year ago.

Bottom Line:

The Metaverse is still relatively new and shares many overlaps with the gaming industry. As blockchain technology evolves, the Metaverse could grow closer to a decentralized space creating opportunities for new companies to emerge. Metaverse indexes and their associated ETFs can help investors track the changing industry, while accessing what could possibly be the next iteration of the internet in its early stages.

The Alerian Galaxy Immersive Digital Worlds Index is the underlying index for the CI Galaxy Metaverse ETF (CMVX CN).

The Alerian Galaxy Global Blockchain Equity, Trusts and ETPs Index (BCHAIN) is the underlying index for the Invesco Alerian Galaxy Blockchain Users and Decentralized Commerce ETF (BLKC).

The S-Network Streaming & Gaming Index (STREAM) is the underlying index for the First Trust S-Network Streaming & Gaming ETF (BNGE).
